Reviewer's report

Title: Correlates of Objectively Measured Overweight/Obesity and Physical Activity in Kenyan School Children: Results from ISCOLE-Kenya

Version: 2 Date: 19 March 2014

Reviewer: Han C Kemper

Reviewer's report:

I have read the paper and the comments of the two reviewers.

I agree with reviewer 2 that the authors in their rewritten paper and cover letter are not taking seriously the phenomenon of stunting as a chronic undernutrition measure.

I suggest that the authors include in the discussion why they have not taken stunting in the analysis and explain that this can influence their results.

So far, the paper in general is acceptable and can be published with inclusion a serious discussion about stunting.
