Reviewer’s report:

Minor Essential Revisions:

Dear authors
Thanks a lot for your cooperation and good answers. In my opinion, you'd better consider the following points:
1- Please describe that your validation study of WHODAS II questionnaire is in process
2- Please add the references for the relation between Beck questionnaire and “Satisfaction of Life Scale” with QOL.
3- It's a good idea to include “different methods of questionnaire administration” as a limitation of the study.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
