Reviewer's report

Title: A single item stress measure as a predictor of severe injury: a prospective cohort study of 16,385 forest industry employees

Version: 4 Date: 18 May 2014

Reviewer: Nadine Andrew

Reviewer's report:

This manuscript is a revised version of one previously reviewed. The authors should be commended for the thorough way in which they have addressed the reviewers comments. The revised manuscript is much improved.

Minor Essential Revision
The authors mentioned that they would be happy to amend the title to better reflect the type of multivariable analyses performed. I agree that it would be best to do this given the changes in the manuscript.

Discretionary Revisions
Can the authors add percentages to Figure 1?

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
