Recommend

In general

Minor Compulsory Revisions

The manuscript provides the large epidemiological studies being undertaken with regards to suicide as well as association with impulsivity and aggression among Chinese university students. It is worthy to publish with a major revision.

Specially

Page 3: Limitation was noted in the abstract, however, it was not noted in the discussion.

Page 7: As far as I know, maybe use: To our knowledge or To the best of our knowledge,

Page 7: Compared with the previous research, our study has different considerations in the design. These differences originate from different region, different measurement tools, different methods and different appraisal standards. The above may remove into discussion.

Page 11. Please provide the full name of “BIS”, similar to The Buss–Perry Aggression Questionnaire (BAQ)

Page 12. The data in “Participants’ Socio-demographic Data” may be in Table 1.

Page 14. Whether or not the hypothesis is supported may answer in the first paragraph of “Discussion”.

Page 14. Discussion should be focused on the theme of the current study.

Page 15. Please check the references “(Pirkis et al.2000; Fairweather et al. 2006”

Page 23. Table 1 may add “Total”, parallel with “Not suicide; Ideators; Attempts”.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published
Statistical review: Yes, and I have assessed the statistics in my report.
