Reviewer's report

Title: Spatial Patterns of the Congenital Heart Disease Prevalence among 0- to 14-year-old Children in Sichuan Basin, P.R China, From 2004 to 2009

Version: 2  Date: 28 February 2014

Reviewer: Keren Agay-Shay

Reviewer's report:

The paper improved and I am pleased with the revision the authors have made. I still think that some general editing of the text, English editing and some editing in the reference list needed; however I do not have any further comments.
