Reviewer's report

Title: Prevalence of Anemia among Under-5 Children in the Ghanaian Population: Estimates from the Ghana Demographic and Health Survey

Version: 5 Date: 1 May 2014

Reviewer: Anand Ahankari

Reviewer's report:

The revised manuscript is much better than previous versions and all major/minor revisions have been considered by the team. I have assessed response letter and reviewers letters and the submission is well written now and has outlined necessary points. The article is having coherence and suggested spelling errors found to be corrected. I do not suspect any errors in this version and the submission seems appropriate for publication/further process recommended by the BMC.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
