Reviewer's report

Title: Leisure time physical activity and sedentary behaviour among school adolescents in Nepal

Version: 1 Date: 24 April 2014

Reviewer: Josep A. Tur

Reviewer's report:

This paper deals with an interesting and necessary subject, which is also not full developed in Nepal.

It needs, however, some minor changes before to be accepted.

Title:
Since the measurement method of PA is a self-reported method (IPAQ), and not direct PA measurement, the title must be changed to: Estimation of Leisure time physical activity and sedentary behaviour among school adolescents in Nepal.

Abstract:
According to Results (page 9, lines 9-10), Page 3, line 18: 'schools with playground (OR: 0.47, 95% CI: 0.22-0.99)' is unclear, please rewrite again.

Methods:
Page 6, line 3: What does terai mean? Please, explain.

Results:
Table 3: Please, add P values

Discussion:
Limitations: Authors must indicate that that is a cross sectional study, then a relationship cause-effect can not be obtained.
Also, strengths of the study must be explained.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests: 
The authors declaration is satisfactory
