Reviewer's report

Title: Climate change and the emergence of vector-borne diseases in Europe: case study of dengue fever

Version: 1 Date: 9 May 2014

Reviewer: fenicia vescio

Reviewer's report:

I do appreciate this study of dengue fever in Europe based on clinical data. The topic is relevant, background focussed and aims clearly stated. The methods are sound, results well presented and thoroughly discussed, possible limitations of the study highlighted.
