Reviewer's report

Title: Culture, Acculturation and Tobacco Use in Hmong, Khmer, Laotians, and Vietnamese Communities in Minnesota

Version: 4 Date: 16 July 2014

Reviewer: Arnab Mukherjea

Reviewer's report:

MAJOR COMPULSORY REVISIONS

None

MINOR ESSENTIAL REVISIONS

The authors claimed that they addressed the question in parentheses (Another very minor question that might be addressed is why the authors surmise the rates of smoking to be considerably lower among Cambodians and Laotians in MN related to the native regions. Might there be acculturative protective factors for these groups?). However, the text in the response to my reviews was not in the revised manuscript. It is important that the authors ensure their revisions are indeed placed in the final publication.

DISCRETIONARY REVISIONS

None

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
