Reviewer's report

Title: A systematic review of the effectiveness of individual, community and societal level interventions at reducing socioeconomic inequalities in obesity-related outcomes amongst children

Version: 2 Date: 27 June 2014

Reviewer: alison Beauchamp

Reviewer's report:

The authors have done a very thorough job of replying to the reviewer's comments. My only comment now relates to use of the term ‘obesity-related outcomes’. Although I had suggested this change in the text, using the term in the title may not be advisable as it could be misconstrued as referring to other health outcomes associated with obesity, such as diabetes. The term is explained further on in the manuscript, and so I think it’s fine to leave it in the text as is. Happy to take the editor’s advice on this.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
