Reviewer's report

Title: Self medicated antibiotics in Bangladesh: a cross-sectional health survey conducted in the Rajshahi city

Version: 2 Date: 6 June 2014

Reviewer: DEBENDRA ROY

Reviewer's report:

1- The scientific organization is not clear. How they find the patients with their age? They should explain.
2- They did not give any information about all classes of antibiotic use.
3- They gave some data two times both in text and tables.
4- Method should be broadly explained.
5- Overall this study was not organized well. It could be acceptable after a whole minor revision.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
