Reviewer's report

Title: Time to Presentation, Pattern and Immediate Health Effects of Alleged Child Sexual Abuse at Two Tertiary Hospitals in Addis Ababa, Ethiopia

Version: 2 Date: 2 January 2014

Reviewer: Catherine Mbagaya

Reviewer's report:

Minor revisions

1. There is need to have the article edited for correctness of English grammar used.
2. The odds ratios should be correctly interpreted eg how many times were male children more likely to delay reporting CSA than females

Discretionary revisions

2. Why does the author use both binary and multiple logistic regression. I guess the latter would suffice.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
