Reviewer's report

Title: Diabetes Mellitus in North West Ethiopia: a community based study

Version: 2 Date: 24 December 2013

Reviewer: Charles Agyemang

Reviewer's report:

Diabetes Mellitus in North West Ethiopia: a community based study

The revised version of Abebe et al. study has improved tremendously. They have also addressed all my concerns.

I have only few comments:

There are spelling mistakes in many places e.g. ‘opner’ in the last sentence in page 11.

The second sentence in page 10, paragraph 3, need correction.

The last sentence in the results should be moved 2 sentences up.

Page 7, last sentence: please replace the word ‘is’ with ‘was’.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
