Reviewer's report

Title: The representativeness of a European multi-center network for influenza-like-illness participatory surveillance

Version: 2 Date: 30 June 2014

Reviewer: Stella Muthuri

Reviewer's report:

Minor Essential Revisions

This is a clearly written manuscript evaluating the representativeness of population sample recruited by the European-wide network of internet-based participatory surveillance systems for influenza-like-illness. However, the limitations of the study are not clearly described within the discussion section.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
