Reviewer's report

Title: The association between passive smoking and the risk of developing acute coronary syndromes, among non-smokers, under the presence of several cardiovascular risk factors: the CARDIO2000 case-control study

Authors:

Demosthenes Panagiotakos (dbpanag@math.uoa.gr)
Christina Chrysohoou (chrysohoou@usa.net)
Christos Pitsavos (chrysohoou@usa.net)
Ioanna Papaioannou (dbpanag@math.uoa.gr)
John Skoumas (chrysohoou@usa.net)
Christodoulos Stefanadis (chrysohoou@usa.net)
Pavlos Toutouzas (chrysohoou@usa.net)

Version: 6 Date: 25 Mar 2002

Reviewer: Dr Malcolm Law

Level of interest: A paper whose findings are important to those with closely related research interests

Advice on publication: Accept after discretionary revisions

They seem to have made the changes so far as they are able and so I think the paper should move forward. You may need to check the manuscript for errors like "Two hundred and nightly seven" on line 8 of the Abstract.
