Title: Parental educational level and Cardiovascular Disease risk factors in schoolchildren in large urban areas of Turkey: Directions for public health policy

Version: 5 Date: 28 December 2004

Reviewer: Debbie Lawlor

Reviewer's report:

General
This current revision focusing just on parental education and with much clearer theoretical basis and appropriate analysis is excellent and I believe makes a very important contribution to this area of scientific research. I would definitely recommend publication. I have one very minor comment regarding the misspelling of a name in the reference list, otherwise I do not feel further changes are required.
