Reviewer's report

Title: Epidemiology of episodic adenolymphangitis: a longitudinal prospective surveillance among a rural community endemic for bancroftian filariasis in coastal Orissa, India

Version: 2 Date: 21 March 2005

Reviewer: James Kazura

Reviewer's report:

General

This ms has been amended appropriately with the following exceptions.
1. The abstract still lists the incidence of ADL to the second decimal point. I do not believe that expression of these data to the second decimal point in appropriate.
2. Syntax and English language usage requires additional copy editing.

I believe that the ms can be accepted otherwise.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)
