Reviewer’s report

Title: The influence of in-pregnancy smoking cessation programs on partner quitting and women’s social support mobilization. A randomized controlled trial.

Version: 4 Date: 13 June 2005

Reviewer: Tim Lancaster

Reviewer’s report:

General
I had only one major query in my original manuscript, that of why these findings had not been reported in the original trial report. The authors have answered this satisfactorily and I have no further comments.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No
