Reviewer's report

Title: HIV prevention programmes for female sex workers in Andhra Pradesh, India: outputs, cost and efficiency

Version: 1 Date: 16 August 2005

Reviewer: Leana Uys

Reviewer's report:

General
This is an article rich in detail, and carefully constructed. It describes the study, especially the detail of financial data collected, clearly, and allows for comparison with other studies. The statistical analysis is well motivated and explained, and the results seem to be reliable. The tables give much detail, and the figures illustrate the data well. The discussion covers all the findings and implications I could see, and is balanced.

-------------------------------------------------------------------------------
Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
None

-------------------------------------------------------------------------------
Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------
Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
