Reviewer's report

Title: Concurrent crack and powder cocaine users from Sao Paulo. Do they represent a different group?

Version: 2 Date: 27 October 2005

Reviewer: Stephan Arndt

Reviewer's report:

General

-----------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

F-tests have a pair of df values but the text consistently only reports one of the pair. In the Results section, the text only reports one of the two. They should report both, e.g., "(F=8.6, df=1, ??????, p=0.003".

-----------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No
