Reviewer's report

Title: The impact of clothing style on bone mineral density among post menopausal women in Morocco

Version: 1 Date: 19 January 2006

Reviewer: Manuel Muñoz-Torres

Reviewer's report:

General
This interesting study examines the relationships between clothing style and BMD in Morocco postmenopausal women. Previously similar findings has been published in other countries. The main limitation of the study is that the levels of 25OH vitamin D was not determined

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
On page 7, there is a typographical error: “…Mars 2005”, March 2005; On table 2 Several parenthesis lacks and this make difficult its understanding

Discretionary Revisions (which the author can choose to ignore)
Discussion: The authors should explain the lack of relationship among DMO, the personal history of fracture and time since menopause

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No
