Reviewer's report

Title: The impact of clothing style on bone mineral density among post menopausal women in Morocco: a case-control study

Version: 2 Date: 28 February 2006

Reviewer: Brian C Lentle

Reviewer's report:

General

--------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

--------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Page 4, para 4: Would it not be more true to say they were referred for "assessment"?
Page 5, para 4: It is a data base more than a reference curve that is required.
Page 5, para 2: "osteoporotic fractures" (also last line).
Page 7, para 1: Perhaps add that one of the limitations of the study needing further work is the impact of vitamin D deficiency on fracture outcomes.
Page 7, para 2: "nutrients".
Page 7, para 3, line 7: "Iranian".
Page 8, Acknowledgements: The general reader may have trouble understanding from whence came the financial support - is this an Institution?

--------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No
