Reviewer's report

Title: Patterns of active and passive smoking, and associated factors in the southeast Anatolian project (SEAP) region, in Turkey

Version: 3 Date: 10 November 2005

Reviewer: Silvano Gallus

Reviewer's report:

General
The manuscript highly improved after the II revision. I only suggest authors to delete the following two sentences, that, although correct, appear to be in contrast with the conclusions of the Abstract:
1) End of 6th paragraph of Discussion: "This suggests that anti smoking campaigns in SEAP region should target women especially".
2) End of Conclusions: "Young people and women seem to be appropriate target for anti-smoking campaigns."

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after discretionary revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
