Title: Blood donors motivation and attitude to non-remunerated blood donorship in Lithuania

Version: 2 Date: 4 May 2006

Reviewer: Joannes El. Chliaoutakis

Reviewer's report:

General

I am afraid, that the authors didn’t pay attention to comment number 3 where they were advised to regroup the categories with very few cases. It would be preferable for them to recode the data of the variable of the "non-remunerated donor group" into 2 categories in all analysis e.g. "First time donation motives", could be recoded into 1) "inspired by an organized event" and 2) else etc. This is important in order for the results to be reliable.

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
