Reviewer's report

Title: Changes in Health Related Quality of Life 3 months after a coronary attack

Version: 1 Date: 21 November 2005

Reviewer: David Gray

Reviewer's report:

General

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

SUGGESTED REVISIONS
1. Change "coronary attack" to "acute coronary syndromes".
2. add a few remarks about usual cardiac care following an acute coronary syndrome.
3. Change 'selected' to 'identified'.
4. State whether patients had a first or subsequent acute coronary syndrome
5. State what change in PCS and MCS would be considered significant and would imply a adverse outcome
6. State co-morbid factors identified that might adversely affect PCS or MCS

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable
