Reviewer's report

Title: Sexual behavior and awareness of Chinese university students in transition with implied risk of sexually transmitted diseases and HIV infection: A cross-sectional study

Version: 5 Date: 9 August 2006
Reviewer: Andrew Vickers

Reviewer's report:

General
The authors have done a reasonable job of incorporating my previous comments. I only have one remaining query. Two of the items in table 4 still seem contradictory and I remain concerned that the labeling is incorrect. In general, earlier grades are more sexually active and sexually aware. However, they appear less likely that later grades to have had multiple or casual sexual partners.
