Reviewer's report

Title: Percutaneous injuries among dental professionals in Washington State

Version: 4 Date: 14 August 2006

Reviewer: Robyn Gershon

Reviewer's report:

General

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

MS. 1580543730941525

I have reviewed the revised M.S. and feel that the authors have answered the points that I made in the earlier review. However, several necessary edits that I made directly to the text and faxed to BioMedCentral were not made. The paper still therefore needs a thorough professional edit. Once this is accomplished and deemed acceptable, the paper should be ready for publication.

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article of importance in its field

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No
