Reviewer's report

Title: Adequate sleep among adolescents is positively associated with health status and health-related behaviors

Version: 4 Date: 6 February 2006

Reviewer: Tonya M Palermo

Reviewer's report:

General

The authors have responded well to the previous critiques and the manuscript is improved. I appreciated the further detail on the sleep assessment as well as the further multivariate analyses presented controlling for gender and grade.

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

My only remaining concerns are related to English language usage in the manuscript. There remain multiple instances of improper English grammar; for instance the use of the term “frequent” when the term “frequency” is intended. The manuscript is still in need of editing for language and typos.

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No
