Reviewer's report

Title: Injuries in Aleppo, Syria; first population-based estimates and characterization of predominant types

Version: 7 Date: 9 February 2006

Reviewer: Marilyn Leff

Reviewer's report:

General I find this to be a major improvement over the other drafts.

-----------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)None

-----------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
The second to last sentence of the first paragraph in the "analyses" section is incomplete --- "Sampling weights were calculated according to the method described in."

-----------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

-----------------------------------------------------------------------------------------------

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No
