Reviewer's report

Title: Levels of diphtheria and tetanus specific IgG of Portuguese adult women, before and after vaccination with adult type Td. Duration of immunity following vaccination.

Version: 3 Date: 11 May 2007

Reviewer: Jo Southern

Reviewer's report:

Apologies for not getting back to you - I have been away for several weeks. I have read the response from the authors and accept their changes. I do feel that it would be useful for the title to be more descriptive as it would only require the addition of a couple of words for it to be sufficiently explicit that on internet searches people would understand the content of the paper better. This does not affect the validity of the study and is an issue of clarity to which I defer the decision to your journal editors.
