Reviewer's report

Title: Levels of diphtheria and tetanus specific IgG of Portuguese adult women, before and after vaccination with adult type Td. Duration of immunity following vaccination.

Version: 3 Date: 2 May 2007

Reviewer: Jeanne-Marie Jacquet

Reviewer's report:

General

----------------------------------------------------------------------------------------------------------------------
Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
My main comment, which regarded conclusion on the impact of antibody concentrations on reactions to the Td vaccine has been addressed and I consider the revised article suitable for publication

----------------------------------------------------------------------------------------------------------------------
Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

----------------------------------------------------------------------------------------------------------------------
Discretionary Revisions (which the author can choose to ignore)

----------------------------------------------------------------------------------------------------------------------

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
