Reviewer's report

Title: Using Intervention Mapping to develop a programme to prevent sexually transmittable infections and HIV among heterosexual migrant men.

Version: 2 Date: 16 February 2007

Reviewer: Jonathan Zenilman

Reviewer's report:

General
1. I think the authors have responded appropriately

2. However, I'm still unsure of the public health impact of this article, as I indicated in my original review. I highly doubt that the model proposed will actually be used in practice

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
