Reviewer's report

**Title:** Comparison of Patient Comprehension of Rapid HIV Pre-Test Fundamentals by Information Delivery Format in an Emergency Department Setting

**Version:** 1 **Date:** 17 August 2007

**Reviewer:** Caroline Sabin

**Reviewer's report:**

**General**

This manuscript (and the accompanying files) is much improved. In particular, the addition of the CONSORT-style flow diagrams have greatly clarified the patient 'flow'. I have no further comments.

--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

**Major Compulsory Revisions** (that the author must respond to before a decision on publication can be reached)

--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

**Minor Essential Revisions** (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

**Discretionary Revisions** (which the author can choose to ignore)

--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

**What next?:** Accept without revision

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** Yes, and I have assessed the statistics in my report.

**Declaration of competing interests:**

I declare that I have no competing interests.
