Reviewer’s report

Title: Prevention of Type 2 Diabetes by lifestyle intervention in an Australian primary health care setting: Greater Green Triangle (GGT) Diabetes Prevention Project

Version: 2 Date: 20 August 2007

Reviewer: Jantine Schuit

Reviewer’s report:

General
I think that the authors have indeed addressed my comments in their revised paper

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
not necessary

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
not necessary

Discretionary Revisions (which the author can choose to ignore)
on page 11 line 280, the statement that this is the first study that measures psychosocial risk factors is not further commented on. One would expect that.

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
I declare that I have no competing interests.
