Version: 3 Date: 31 January 2007

Reviewer's report:

General
This version reads much much better. The authors have improved substantially in presenting the study itself as well as the findings from the study; the discussion and conclusions are now better supported by the data.

-------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
Suggest to change the title to: "Smoking, cessation and expenditure among urban workers, rural migrant workers and rural residents in China"

-------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct).
Check the missed punctuations. I see a lot in my copy.

-------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

-------------------------------------------------------------------

What next?: Accept after minor essential revisions
