Title: Potential Cost Savings with Terrestrial Rabies Control

Version: 3 Date: 6 December 2006

Reviewer: Henry Wilde

Reviewer's report:

General
This is an excellent study of the cost/benefit situation of rabies control in wildlife. We had similar interests with possible EPI human preexposure prophylaxis in children who are almost half of rabies cases worldwide (Chulasungandha P et al Vaccine 2005 24: 1478-82, Sintunawa C et al, J Med Aasso Thailand 2004; 87: 1530-8). It is well written and should be published as is.
