Reviewer’s report

Title: The role of paternal psychosocial work condition on mental health of their children: A case-control study

Version: 3 Date: 21 January 2008

Reviewer: Jim van Os

Reviewer’s report:

The revised version of the manuscript resulted in substantial clarifications and improvements.

However, I recommend to firstly discuss the effects of paternal psychosocial stress on development of psychopathology in results and discussion section. Secondly, the association between ethnicity (confounder) and development of psychopathology can be discussed.

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
