Reviewer’s report

Title: Prevalence of Prehypertension and Associated Cardiovascular Risk Profiles among Prediabetic Omani Adults

Version: 2 Date: 27 November 2007

Reviewer: Yehonatan Sharabi

Reviewer’s report:

General
The authors did the most that can be learned from this small population study. No need for further revisions.

------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

None

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
