Reviewer's report

**Title:** Are hygiene and public health interventions likely to improve outcomes for Australian Aboriginal children living in remote communities? A systematic review of the literature

**Version:** 2  **Date:** 19 March 2008

**Reviewer:** Lorna L Fewtrell

**Reviewer's report:**

I have re-read the paper and find it much improved. I would still prefer to see the final Table as a figure (as per original comments) - but I am not going to press the point. I think the background adds to the strength of the paper and I would now be happy to recommend it for publication.
