Reviewer's report

Title: Psychiatric disorders and urbanization in Germany

Version: 4 Date: 4 October 2007

Reviewer: Benjamin Vicente

Reviewer's report:

General
The current version of the paper represents a significant improvement. Main theme is clearer, easy to follow and well connected between sections. Content wise I feel satisfied, form needs some extra work.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Minor details in tables and references should be re-revised but overall English language, despite its present improvement, needs to be checked by a native English speaker.

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
