Title: Predictors of overweight and obesity in five to seven year old children in Germany: results from cross-sectional studies

Version: 2 Date: 12 April 2008

Reviewer: Francisco B Ortega

Reviewer's report:

I find the revised version much improved. All my comments have been taken into consideration and proper answers given. I am satisfied with the manuscript in its current form and I think that it is a significant contribution to the previous literature, mainly due to the large sample used and the number of exposures studied.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
