Reviewer's report

Title: The 10/66 Dementia Research Group's fully operationalised DSM IV dementia computerized diagnostic algorithm, compared with the 10/66 dementia algorithm and a clinician diagnosis: a population validation study.

Version: 2 Date: 13 April 2008

Reviewer: Jan J DE LEPELEIRE

Reviewer's report:

My major concerns are relieved by the answers you gave. The paper has been clarified enormously.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
