Reviewer's report

**Title:** Use of Traditional Complementary and Alternative Medicine for HIV patients in KwaZulu-Natal, South Africa

**Version:** 3  **Date:** 8 July 2008

**Reviewer:** Walter Kipp

**Reviewer's report:**

I have reviewed the changes made by the authors to the above manuscript. In regard to point 1 in my original review, I still feel that in the limitations a statement should be added that says that this was a study using hospital patients, therefore the study results cannot be generalized to the general population of persons with living with HIV/AIDS in the study area/SA. Otherwise, I feel that all my concerns have been adequately addressed. I would appreciate if you could communicate this e-mail to the authors.
