Reviewer’s report

Title: Association between fertility and HIV status: what implications for HIV estimates?

Version: 2 Date: 2 July 2008

Reviewer: Jesus M Garcia Calleja

Reviewer’s report:

accepted

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

The authors have answered and clarified all the issues raised by reviewers. Perhaps the only point missing in the discussion is that with an increasing coverage of ART in Cameroon and all SSA countries, fertility is increasing among HIV infected women and is becoming an issue of HIV + women under ART that are or want to be pregnant.
