Reviewer's report

Title: Does economic development contribute to sex differences in ischaemic heart disease mortality? Hong Kong as a natural experiment using a case-control study

Version: 2 Date: 7 January 2008

Reviewer: Barbara Yawn

Reviewer's report:

Suggestion: Accept with existing revisions

General: The authors were very responsive to the suggestions made.

Major revision: None suggested.

Minor revisions; None suggested.

Discretionary: I really don't have any of significance. I believe that there are one or two misspelled words and a couple of places were an adjective would be helpful but these will be taken care of by the editorial staff I am sure.

What next?: Accept after discretionary revisions
