Reviewer's report

Title: The impact of a minimal smoking cessation intervention for pregnant women and their partners on perinatal smoking behaviour in primary health care: a real-life controlled study

Version: 3 Date: 27 August 2008

Reviewer: Mark Petticrew

Reviewer's report:

On page 4 (last paragraph) you say "the objectives of this study...were to compare smoking cessation among pregnant women in the city of Trondheim" but you don't say what these women were compared with (i.e. Bergen). A minor wording change is needed here.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
