Reviewer's report

Title: Alcohol use and misuse: What are the contributions of occupation and work organization conditions?

Version: 5 Date: 2 July 2008

Reviewer: Andrew Roddam

Reviewer's report:

The reviewer has responded to the points raised during the previous review round. On the whole the response are adequate and I now only have a couple of very minor comments which I trust the author can make.

1. In table 1 there are still some items where its not immediately obvious what the units are - for example, physical health with a mean of 0.77 - what does 0.77 mean. I suggest the author simply improves the labeling of the variables in this table, including adding in units where appropriate.

2. In table 2, p-values can never be 0.000, please replace with <0.001.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
