Reviewer's report

**Title:** Efficacious, Effective, and Embedded Interventions: Implementation Research in Infectious Disease Control

**Version:** 2  **Date:** 26 August 2008

**Reviewer:** Gunnar Aksel Bjune

**Reviewer's report:**

Congratulations! I think this edition reads very well and could become a benchmark in the development of implementation research. There are no suggestions for revisions from my side (seeing that the authors seem to have found all my previous suggestions - with one exception, to which I agree).

I sincerely hope that we can see in the paper the growth of a group of scientists that will go on developing this field of research - also towards operationalization. If that is the case, I would be very happy to stay in touch.

**Level of interest:** An article of outstanding merit and interest in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests.
