Reviewer's report

Title: Help-seeking before and after episodes of self-harm: A descriptive study in school pupils in England

Version: 2 Date: 2 March 2008

Reviewer: Frank Deane

Reviewer's report:

The authors have addressed the reviewers concerns and clarified the items outlined in the original review. I have no further suggested revisions. As noted in my original reviews I think this study will be of high interest to the journal readership and anyone interested in better understanding why young people who engage in self harm behaviours, do and do not seek help before or after the event.

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
