Reviewer's report

Title: Barriers for introducing HIV testing among TB patients in Jogjakarta, Indonesia

Version: 2 Date: 15 October 2008

Reviewer: Douglas Wilson

Reviewer's report:

The authors' revisions are very helpful - no major revisions needed.

Minor revision for consideration: the coding of the responses in Table 2 is misleading for a binary response - e.g. Perceived benefit Yes '=/-' No '--' does not approximate to 100%. Better only to code either the Yes or the No.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
